Celebrating Individual Academic Growth !

CBIS is committed to individual student growth. No matter where students start academically, we want them to maximize their growth during the year.

NWEA is an assessment tool that indicates the academic growth of each student at CBIS. We administer the test three times during the year. Students take the assessment in the fall. That score indicates their Reading and Math level. An individual goal is then created which reflects the expected amount of growth that the student should achieve during the course of the year. We will take the assessment again in the spring to determine each student's academic growth.

We want to recognize and celebrate with all those students who maximize their academic growth. **AGAIN...** this is about individual growth for this school year.

IF a student meets their NWEA growth targets, they will be invited to join us for a fun-filled day at the Indianapolis Zoo in May.

See the next page for suggestions on how you can help your child reach their goals and... **Grow to the Zoo !.**

Celebrating Individual Academic Growth !

- Talk to your child about their NWEA goals for reading and math.
- Discuss their Winter NWEA scores. This is a good indication of progress toward those goals.
- Encourage your child to do their best in each of their classes every day.
- Encourage them do the Compass Learning lessons as often as possible. These online activities are specifically designed to help students achieve their NWEA goals. Students can even do these at home.
- Talk to your child's teacher. They are a great resource.

We want every student to reach their goals and...
